Wood treated with Tenino Copper Naphthenate must not be used where it may come in contact with food, feed, or food contact surfaces. Tenino Copper Naphthenate treated wood is not suitable for garden applications where fruit and or vegetables will be grown. Wood treated with this product shall not be used in the construction of beehives. When field treating, do so in a manner that the product does not drip into sensitive environments. Whenever possible, apply field treatments prior to assembling the structure over the body of water or sensitive environment.

APPLICATION PROCEDURES:

For Exterior Use:
Tenino Copper Naphthenate is a ready-to-use formula. Agitate well before using. Make sure wood is thoroughly wet. Do not contaminate water, food or feed by storage or disposal. This product does not drip into sensitive environments. Whenever possible, apply field treatments prior to assembling the structure over the body of water or sensitive environment.

DIP, ROLLER OR BRUSH APPLICATION ABOVE GROUND CONTACT: Do not apply with any sprayer or by air blast method. Coverage is dependent upon application method and the refractory nature of the wood being treated. One gallon of diluted Tenino Copper Naphthenate will cover approximately 100–300 sq. ft. of surface. In high hazard areas, two applications may be desirable.

GROUND CONTACT: Treat with Tenino Copper Naphthenate to a retention in the wood of 0.04 to 0.06 lbs copper metal* (in accordance with AWPA Standards). Two applications or extended soaking may be desirable.

END CUT TREATMENTS: To satisfy AWPA M4, apply Tenino Copper Naphthenate to cuts, holes or injuries.

Warranty Disclaimer
